The clock is ticking – move fast to identify risk with an intuitive platform trusted by leading investigatory, compliance & legal teams

The Challenge: From uncovering potential fraud to identifying PII / PHI / PCI, internal investigations and compliance audits require speed and accuracy to control risk and cost exposures. With the clock ticking, investigatory, legal and compliance teams need better solutions to efficiently combat an increasing volume of data and greater sophistication of actors hiding impropriety.

The Solution: Sightline by Consilio gives investigatory, legal & compliance teams control and visibility through the entire workflow. Leveraging a single, unified platform, users more efficiently and accurately gather and analyze data, then quickly identify and package actionable facts.

Sightline by Consilio helps for Investigations:

Control & visibility. Quickly and easily load, process, search, review and produce data. Connect to a M365 for a mailbox collection, drag-and-drop loose eFiles or archives, or use our desktop uploader for faster speeds. Sightline by Consilio shows progress as files are processed, so users have visibility and control throughout the process.

Efficiency. When you kick off an investigation, case teams often don't know what they don't know. Sightline by Consilio is designed to provide quick insights into a document set's composition so teams can structure next steps quickly.

Accuracy. It is human nature; the faster you go, the higher the probability for error. Sightline defies nature with tools designed to structure and execute reviews for efficiency, increase coding speed and reduce reviewer fatigue.

Key Features

Gather & Process

Quickly and easily upload and process data. Simply drag, drop and start saving.

With a variety of options to gather and upload data, most users are up and running after just a single training session.

Drag & Drop Processing: Drag files from a desktop into a zip or other container file and drop into Sightline by Consilio for processing. Sightline by Consilio shows progress as files are processed, reporting any errors to provide transparency throughout the process.

Speed Coding

Speed up coding without sacrificing quality

Optimized Document Sorting: Search results are automatically sorted to prioritize documents related to pure search its so similar documents can be reviewed together to optimize coding speed and quality.

Progressive Coding Forms: Coding forms present decisions in a progressive, logical flow vs. everything-at-once – increasing efficiency of coding decisions.

Coding Stamps & Code Same as Last: Reviewers reach a higher “cruising altitude” with personalized one-click tools to minimize repetitive manual coding actions.

Codesync Similar Documents: Reviewers can code entire families, email threads or textual near dupe groups as a unit, so consistent coding is applied to all selected documents with the click of a button.

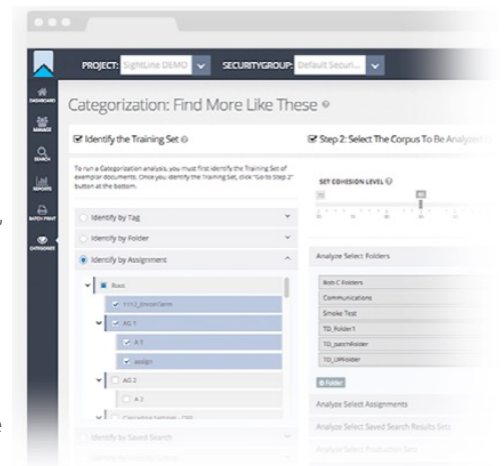

Conceptual Analytics

Discover core concepts, uncover patterns in data and relationships between documents

Conceptual Searching: Compose a concept search to identify documents that are conceptually-relevant to the material investigators are looking for.

Categorization: Find more like these. Built-in categorization finds conceptually similar documents to a training set based on key documents, tagged work product, saved searches and more.

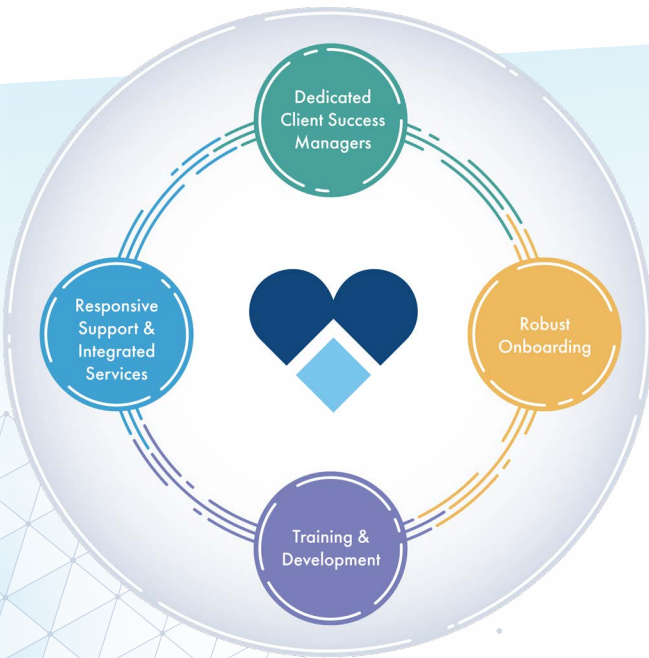

Intelligent Review: DocView automatically highlights conceptually-relevant portions of content – focusing your attention on what matters. Optionally, sort document lists by conceptual relevance so your teams effectively prioritize review time.

Pre-Built Models

Leverage hundreds of pre-built reusable and customizable data models with the click of a button

Harness the power of Sightline by Consilio's always-on analytics and its strong suite of data exploration & interactive visualizations to provide quick insights for experts and novices alike. With Sightline by Consilio, you can simply load data and leverage existing models to identify actionable facts quickly. Enhance and customize models to fit the specifics of your organization to refine results over time and gain even more leverage. Customized models are portable across matters through available project templating.

sightline care

Best-in-class service and support from the global leader in eDiscovery. When you choose Sightline by Consilio, you benefit from a strategic partner committed to your success with expertise solving for the toughest challenges. We do this by offering:

- **Dedicated Client Success Managers** support you from onboarding and training through maximizing your Sightline investment.
- **Sightline-certified Project Managers** working as experienced extensions of your own team – able to support you no matter the task.
- **Seamlessly integrated support services** offer bandwidth available on demand at a reasonable cost.
- **Secure, private hosted infrastructure** provides peace of mind that you and your client's data are in good hands.
- **Self- or Full-service options** provide you with support flexibility across regions, matter types, or individual projects
