Consilio continually invests in innovative, patent-pending technology and workflows around ECA and Analytics to streamline eDiscovery elements that have the most influence on downstream project costs and timelines. Consillio Advanced Discovery implements sophisticated end-to-end eDiscovery methods, technologies, and expertise to deliver higher quality, lower cost case outcomes

ECA and Analytics Saves Time and Costs by

- Culling and grouping similar documents using near duplicate detection, email threading and custodian identification

- Searching, analyzing, culling and performing TAR on all data

- Uncovering the most relevant documents quickly with immediate availability for review

CASE STUDY:

Integrating Advanced Discovery Saves Clients $3 Mil

Four million documents to be reviewed in 77 days with no effective search term filter due to case theory. Without advanced analytics, at a rate of 50 documents per hour, this would require 100 reviewers and 103 days at an estimated cost of $3.69 million.

Using Structured Analytics, Conceptual Analytics and Predictive Coding components of Advanced Discovery, the client saved over $3 million dollars in unnecessary review costs by:

- Reducing the review documents by over 40% using advanced analytics techniques

- Allowing for smaller, more efficient review team to address prioritized documents

- Providing critical time and cost savings; allowing reviewers to move toward next phase of privilege review more than a month ahead of schedule

- Providing defensible, repeatable process without inconsistency or errors

Our Advanced Discovery Expertise

- Early case assessment
- Review Prioritization
- Large datasets with small timelines
- Internal investigations
- Culling

- Opposing party productions
- Quality control and quality assurance
- Increasing speed and accuracy
- Predictive coding
- and more…
